In re the application of

EDWARD J. A. POPE and

KENNETH M. KRATSCH

APPLICATIONS OF PHOTOCURABLE

PRE-CERAMIC POLYMERS

Serial No. 09/680,828 :

Filed: October 6, 2000 :

RECEIVED

DEC 3 0 2003

OFFICE OF PETITIONS

## **AMENDMENT**

To the Commissioner of Patents and Trademarks:

In response to an office action mailed September 24, 2002 the applicants hereby amend their application as follow:

In the claims:

Amend claim 49 as follows:

NOV 8 0 2003

OFFICE OF PETITIONS

- 49. (Amended) A process of forming a photo-curable preceramic polymer, poly(ethynyl)-carbosilane to silicon carbide ceramic comprising the steps of:
- a. reacting sodium acetylide with organo-chlorosilanes; and b. condensing [(polymerizing)] the resultant organo-(ethynyl)chlorosilane product of step a with an excess of an alkali metal to form a silicon carbide ceramic.

Amended claim 49 as follows:

- 49. (Amended) A process of forming a photo-curable preceramic polymer, poly(ethynyl)-carbosilane to silicon carbide ceramic comprising the steps of:
- a. reacting sodium acetylide with organo-chlorosilanes; and
